PROFESSIONAL SUMMARY

Frontend Developer with 3 years of experience building scalable, high-performance, SEO-optimized web applications using React.js, Next.js, JavaScript, and TypeScript. Strong experience in Server-Side Rendering (SSR), Static Site Generation (SSG), Incremental Static Regeneration (ISR), and modern state management using Redux Toolkit and React Query. Proven expertise in SaaS platforms, multi-tenant architecture, role-based access control (RBAC), authentication, and REST API integration, with a focus on shipping scalable, search-optimized features.

TECHNICAL SKILLS

Frontend: React.js, Next.js (App & Pages Router), JavaScript (ES6+), TypeScript, Angular
State Management: Redux Toolkit, React Redux, React Query (TanStack Query)
Rendering & Performance: CSR, SSR, SSG, ISR, Code Splitting, Lazy Loading, Web Vitals
SEO: Technical SEO, Core Web Vitals optimization, semantic markup, metadata & structured data
UI & Styling: Tailwind CSS, SCSS, Bootstrap, Chakra UI, Material UI, Styled Components
Forms: React Hook Form, Formik
Authentication & Security: JWT, NextAuth, RBAC, Protected Routes, Multi-tenancy
API & Backend: REST APIs, Node.js, Express.js, NestJS, TypeORM
Databases: MySQL, MS SQL Server
Tools: Git, GitHub, Bitbucket, Jira, Figma, Swagger (OpenAPI), CI/CD

PROFESSIONAL EXPERIENCE

Frontend Developer | W3era Web Technology Pvt. Ltd.
Wranker.com *April 2026 – Present*

- Developed scalable, SEO-optimized features using **Next.js, React, and TypeScript** with a focus on performance and Core Web Vitals.
- Built **Local Marketing** features for managing business listings and location-based SEO.
- Integrated **Google Location/Places APIs** for business and location-based search functionality.
- Developed **Website Analyzer and Site Audit** tools to identify technical SEO and performance issues.
- Built **Keyword Tracker** for monitoring keyword rankings and SEO performance.
- Developed **Domain Organic Research** tools for keyword, competitor, and organic search analysis.
- Contributed to **multi-agency SaaS architecture** with organization-level feature delivery and data isolation.
- Built reusable, component-driven UI architecture for scalable and consistent feature development.

Senior Frontend Developer | Rasacode Technologies Pvt. Ltd.

Birth Care Management System — Netherlands
Frontend Developer *October 2023 – Dec 2024*

- Built a scalable healthcare platform using Next.js, React, Redux Toolkit, and React Query, supporting 1,000+ active users across multiple hospitals.
- Implemented multilingual support using Next-intl, enabling 100% localization coverage for Dutch and English users.
- Developed secure Role-Based Access Control (RBAC) using NextAuth and JWT, reducing unauthorized access issues by 60%.
- Optimized application performance using SSR and SSG, improving initial page load speed by 40% and increasing Lighthouse performance score from 72 to 92+.
- Reduced redundant API calls by 35% using React Query caching and optimized state management.
- Built reusable component architecture, decreasing development time for new features by 30%.
- Improved overall user experience and navigation flow, contributing to a 45% increase in task completion efficiency.

Flight Ticket Booking System (B2B)

Frontend Developer *Jan 2024 – Dec 2024*

- Designed and implemented booking workflows for one-way and round-trip flights, improving booking completion rate by 35%.
- Integrated REST APIs for flight booking, wallet management, and transaction history, reducing manual processing effort by 50%.
- Built secure, role-based agent dashboards supporting 500+ active agents, enabling real-time financial tracking and reporting.
- Implemented optimized state management and API handling, reducing booking response time by 40%.
- Developed wallet recharge and requisition features, improving transaction accuracy by 30%.
- Improved UI responsiveness and usability, increasing agent productivity by 25%.
- Reduced frontend bugs by 20% through structured component architecture and code reviews.

Admin Panel — Flight Ticketing System

Frontend Developer *Jan 2024 – Dec 2024*

- Developed a centralized admin dashboard with advanced role-based access control (RBAC), improving system-level security by 50%.
- Implemented a comprehensive user management module for 1,000+ users, reducing manual admin effort by 40%.
- Built booking logs and transaction tracking features handling 10,000+ monthly transactions, improving audit transparency and traceability.
- Designed real-time data tables with filtering, sorting, and search capabilities, reducing admin task completion time by 35%.
- Integrated secure password reset and permission control flows, minimizing unauthorized access risks by 45%.
- Improved dashboard performance by 30% through optimized API calls and reusable component architecture.
- Ensured responsive, cross-browser compatible UI, increasing admin productivity and operational efficiency.

DeelFlow AI — AI-Enhanced Real Estate Admin Panel

Frontend Developer *Jan 2025 – Dec 2025*

- Built a scalable admin panel using Next.js App Router and React, supporting real-time lead and campaign management for 500+ properties.
- Implemented global state management using Redux Toolkit and React Query, reducing redundant API calls by 40%.
- Developed responsive, mobile-first UI using Tailwind CSS, improving cross-device usability and increasing user engagement by 30%.
- Built complex dashboards with advanced filtering, sorting, and analytics for leads, campaigns, and transaction tracking, improving decision-making speed by 35%.
- Collaborated closely with backend (Python) teams to align API contracts and improve data consistency across modules.

Wholesale Property Management Platform (UK Market — SaaS)

Full Stack Developer *June 2025 – April 2026*

- Developed scalable frontend modules using React, Next.js, and Tailwind CSS for property listings, campaign management, and lead tracking, supporting 1,000+ active properties.
- Designed and implemented backend APIs using NestJS, TypeORM, and RESTful architecture, reducing API response time by 35%.
- Built secure Role-Based Access Control (RBAC) supporting Super Admin, Admin, and User roles with fine-grained permissions, improving system-level security by 60%.
- Implemented JWT-based authentication with access and refresh tokens, enhancing session security and reducing unauthorized access risks by 50%.
- Architected a multi-tenant SaaS system with organization-level data isolation, ensuring secure segregation of tenant data across multiple companies.
- Modeled relational database schemas in MS SQL Server and optimized indexes and queries, improving data retrieval efficiency by 40%.
- Integrated Swagger (OpenAPI) for API documentation and streamlined backend testing workflows, reducing integration issues by 30%.
- Implemented DTO validation, centralized error handling, and standardized API responses to improve system reliability.
- Collaborated with frontend and product teams to refine API contracts and business logic, accelerating feature delivery by 25%.

Swami Vivekananda University Website

Frontend Developer *June 2025 – April 2026*

- Developed dynamic and reusable UI components using Angular, supporting 5,000+ monthly active users.
- Integrated REST APIs with a .NET MVC backend for admissions, course management, and content updates, reducing manual data handling by 40%.
- Built reusable components and custom directives, decreasing feature development time by 25%.
- Delivered responsive, WCAG-compliant, cross-browser compatible UI, improving accessibility score to 90+.
- Improved application performance using lazy loading and module-level code splitting, reducing initial load time by 35%.
- Optimized API data fetching and state handling, reducing page reload dependencies by 30%.
- Collaborated with backend developers and university stakeholders to translate requirements into scalable frontend solutions.

EDUCATION

Bachelor of Arts (Economics) *2014 – 2017*
The University of Burdwan
